

The New Zealand Chapter of the Environment Institute of Australia and New Zealand (EIANZ) will host the 2010 EIANZ conference in Te Papa, Wellington, New Zealand, 26-29 October 2010.

# CALL FOR PAPERS

The title of the conference is **“From Discovery to Delivery: Science, Policy, Leadership and Action”**. These are the four elements which, together, are essential for sound environmental management. Because 2010 is the International Year for Biodiversity, we expect that many of the conference papers and workshops will address this particular aspect of environmental management.

This is a unique opportunity to present your work and ideas to a multi-disciplinary environmental practitioner audience. The deadline for abstract submission is 4 June 2010.

**We are now seeking submitted papers for the seven conference streams:**

- Valuing ecosystems
- Community action
- Business leadership
- Urban challenges
- Natural resource governance
- Assessment and monitoring
- Wicked problems

These topics are designed to appeal to a wide range of disciplines including ecologists, economists, local and central government policy analysts, urban designers, community development specialists, business leaders and industry representatives – more information about the programme, confirmed keynote speakers and submitting an abstract is available on [www.confer.co.nz/eianz2010/programme.html](http://www.confer.co.nz/eianz2010/programme.html) or by contacting the conference secretariat.
